iPhone Instructions

Set up iNaturalist onto your iPhone.

1. Download the App from your App store and register an account.

Take photos using iNaturalist on your iPhone.

- 1. Tap 'Observe' button to take a photo(s). When you are happy with the photo, tap 'Next'.
- 2. Enter what you saw.

Please note that the suggestions that iNaturalist gives may NOT be accurate to the Hong Kong area so we recommend typing something simple e.g. Plant, Butterfly, Reptile, Insect, Bird, etc.

Check out the 'Identification Guide' for more information.

3. The time and date will be added automatically.

- 4. The location will be added automatically. (If not, check Privacy in the Settings of your phone)
- 5. If the specimen is NOT wild, check the 'Captive/Cultivated' section to 'Yes'.
- 6. Go Back and tap Share to publish your observation.

Android Instructions

Set up iNaturalist onto your Android.

1. Download the App from your App store and register an account.

Take photos using iNaturalist on your Android.

1. Tap the 'plus' icon.

- 2. Tap 'Take Photo' and take a photo(s). When you are happy with the photo, tap √.
- 3. Enter what you saw.

Please note that the suggestions that iNaturalist gives may NOT be accurate to the Hong Kong area so we recommend typing something simple e.g. Plant, Butterfly, Reptile, Insect, Bird, etc.

Check out the 'Identification Guide' for more information.

- 4. The time and date will be added automatically.
- 5. The location will be added automatically. (If not, check Privacy in the Settings of your phone)
- 6. If the specimen is NOT wild, check the 'Captive/Cultivated' box.
- 7. Go Back and press 🗸 in the top right corner publish your observation
