EGRETRY COUNT TRAINING WORKSHOP

Sponsored by

漁農自然護理署資助

水鳥普查是香港觀鳥會策劃及執行的專業雀鳥普查計劃。項目於一九七九年展開，二〇〇〇年起更獲漁農自然護理署資助進行。

是項全年性的普查由三十多位資深鳥友於工餘時間協助進行，收集各鳥種數量資料。普查項目包括(1)每月水鳥普查；(2)遷徙水鳥統計以及(3)鷺鳥林統計。這些數據正是監察濕地的變遷及其瀕危品種和數量的改變的重要基礎資料。同時亦成為管理及保育內后海灣國際重要濕地的重要部份。近年鷺鳥林普查顯示繁殖鷺鳥正在上升，鷺鳥巢的數目在 2005 更超過一千個。

「**鷺鳥林普查訓練工作坊**」的舉辦是希望讓更多鳥友認識鷺鳥林及鷺鳥普查的技巧，並鼓勵及提升更多鳥友參與鷺鳥普查工作。更重要的是，讓大家直接參與和貢獻在國際重要濕地的保育和管理工作，從而獲取更大的滿足感。

歡迎會員參與「**鷺鳥林普查訓練工作坊**」！

The Waterbird Monitoring Programme is an integrated professional programme coordinated by The Hong Kong Bird Watching Society. The Waterbird counts began in 1979. Since 2000, this project has been funded by Agriculture, Fisheries and Conservation Department.

This is one of the largest programme of the Society with more than 30 active volunteers contributing their time, carrying out bird survey throughout the year, to collect population data at species level. The programme consists of three parts (1) Monthly Waterbird Surveys; (2) Shorebird Surveys and (3) Egretty Counts. These data are essential for monitoring the value of wetlands, endangered species, population and environmental changes. It forms an important component of the conservation and management of the Mai Po Inner Deep Bay Ramsar Site. Recent egretty counts indicates that the nesting egrets exhibit an increasing trend and reached 1000 nests in 2005.

The “**Egretty Count Training Workshop**” is designed to allow more members to participate in egretty count. It is a good opportunity to learn the techniques required for egretty counting at the Mai Po Inner Deep Bay area and other area of Hong Kong, plus, the satisfaction of contributing to the conservation and management work of the Ramsar Site.

All members are welcomed.
